

BullAnt **SECURITY**

Complete Security Solutions

ABOUT YOU

You manage environments where security and safety can't be compromised. From protecting property, assets or people to maintaining smooth and efficient operations, your focus is on keeping everything safe, secure, operating well and under control.

You need security solutions that match your business needs, work seamlessly, scale easily and are backed by people who understand the importance of compliance, control and continuity.

INDUSTRIES WE SERVE

We deliver tailored security solutions, across a wide range of sectors, supporting organisations and operators who need reliable protection and peace of mind from an experienced and trusted partner. We partner with a range of industries, including;

Accommodation

Aged Care, Childcare & Health Care

Business Owners and Operators

Councils

Defense

Educational facilities (schools, TAFEs & universities)

Facility Management

Government departments & agencies

Industrial Sites

Infrastructure and Utility sites

Mining Camps

Offices and Coworking Spaces

Property & Strata Management

Resource Sector

ABOUT US

BullAnt Security has been safeguarding Western Australian businesses for over 40 years, delivering complete security solutions that protect what matters most. Trusted across major industry sectors, we partner with the businesses and institutions that keep WA moving, providing tailored solutions, client education and responsive ongoing maintenance and support.

We partner with people like you across a range of industries to safeguard people, property assets and operations. Our services are built on experience, technical expertise and a commitment to long-term support.

OUR SOLUTIONS

Locksmith Solutions

- Restricted Key Systems
- Locks & Locking Devices
- Smart Locks & Keyless Entry
- Door & Gate Hardware
- Commercial Padlocks

Electronic Access Control

- Access Management
- Integration & Automation
- Preventative Maintenance
- Managed Services
- Access Hardware & Software

CCTV, Surveillance & Alarms

- CCTV & Surveillance
- Intruder Alarms
- Integration & Automation
- Monitoring, Recording & Notification
- Preventative Maintenance

Security Products

- Locks, Keys, Cards & Fobs
- Door & Gate Hardware
- Electronic Security Equip.
- Key Cabinets & Key Safes
- Padlocks & Accessories
- Safes & Lock Boxes

OUR SERVICES

We provide a complete suite of security services designed to keep your organisation protected, operational and in control. From day-to-day support to complex system upgrades, our team delivers practical solutions backed by decades of experience.

- **Locksmith services**
- **Electronic security services**
- **Rekeying and master keying**
- **System design, installations and upgrades**
- **Maintenance and repairs**
- **Managed services**
- **Integration and automation**
- **Custom solutions**

LOCKSMITH SOLUTIONS

Practical high-performance products to protect people, property and operations.

BullAnt provides a full suite of restricted key systems, commercial locks, locking devices and access hardware solutions. We help you secure what matters with reliable quality products, expert advice and long-term support.

THE BENEFITS TO YOUR BUSINESS

- Tailored, affordable and lasting mechanical access control
- Locks and access hardware built for durability, commercial and industrial use
- Clear control over who can access what
- Protection against unauthorised entry or tampering
- Solutions matched to your environment and compliance needs
- Ongoing maintenance

Locksmith Solutions

- Restricted Key Systems
- Locks & Locking Devices
- Smart Locks & Keyless Entry
- Door & Gate Hardware
- Custom Padlocks

- Preventative Maintenance

Security Products

- Locks, Keys, Cards & Fobs
- Door & Gate Hardware
- Electronic Security Equip.
- Key Cabinets & Key Safes
- Padlocks & Accessories
- Safes & Lock Boxes

RESTRICTED KEY SYSTEMS

Restricted Key Systems deliver a customised, high-security access solution for commercial and industrial properties. They allow businesses to assign different access levels to doors, gates and other entry points, giving users only the access they need.

With patent-protected key profiles, keys can only be duplicated by authorised locksmiths for approved signatories, preventing unauthorised copies and improving accountability. This makes restricted systems a cost-effective, proven way to manage access securely across large, complex or remote sites.

LOCKS & LOCKING DEVICES

Commercial-grade locks and locking devices are the backbone of physical security. From deadbolts and mortice locks to high-security cylinders, they secure access points, provide reliability in commercial and industrial uses.

Our range is built for durability and peace of mind, with options including heavy-duty locksets, padlocks, night latches, and mortice locks. Designed to withstand high-traffic use and resist tampering, these solutions safeguard assets and streamline security management across single and multi-site operations.

SMART LOCKS & KEYLESS ENTRY

Keyless entry locks replace traditional keys, offering secure and convenient access through push buttons, keypads, cards, FOBs, or smartphone apps. They provide a flexible way to control entry for homes, offices, storerooms, and server rooms. With remote management, activity monitoring, and features like auto-locking, tamper alerts, and system integration, keyless locks make access management simple and secure, ideal for small businesses, strata properties, shared offices, and storage areas.

DOOR & GATE HARDWARE

Door and gate hardware is fundamental to both security and operational efficiency. From handles and closers to seals, hinges, blocker plates, panic bars, exit devices and access control accessories, these components ensure doors and gates operate smoothly, close securely and meet compliance standards. Built for durability, they are designed to withstand the demands of business, commercial and industrial environments.

PADLOCKS

Commercial padlocks provide portable, versatile security for gates, storage units, equipment and more. Available in keyed alike or keyed to differ high-security formats, they're built to resist cutting, picking and harsh environments—ideal for temporary or mobile protection. The right choice depends on body material, shackle design, and environmental suitability. Our padlocks are built tough and custom-assembled to meet specific keying and operational needs.

ELECTRONIC ACCESS CONTROL

BullAnt's access control solutions combine physical security with intelligent technology to improve security and safety, provide integration of systems and enhance automation across businesses

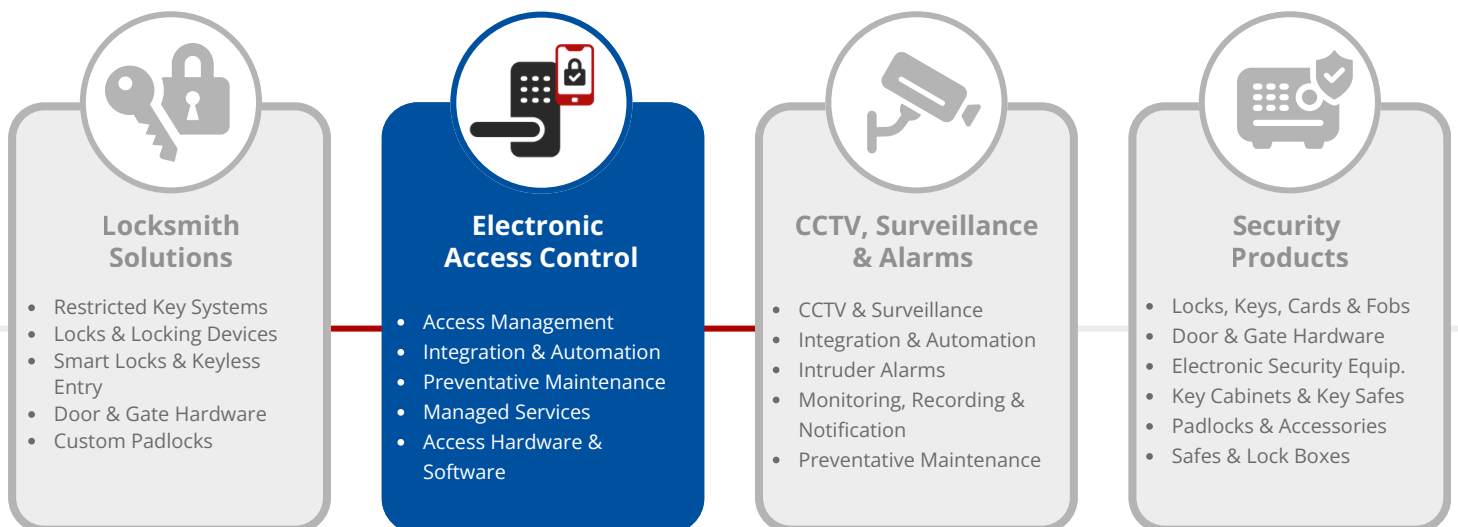

We help you stay in control of who can access your site, when and how.

Whether it's a single site or multiple facilities, we tailor solutions that support your people, protect your property and streamline operations.

THE BENEFITS TO YOUR BUSINESS

- Safer, more secure and operationally efficient workplaces
- Less risk through smarter management and control
- Improved control, visibility and auditability
- No more missing or lost keys
- Greener property ratings, through eco-friendly automations
- Flexibility and scalability that adapts to your business as it grows
- Reduced operational costs
- Controlled and quicker access management

ACCESS MANAGEMENT

Electronic Access Control gives you complete control over who can enter your premises, when they can enter and where they can go. Access permissions can be issued or revoked instantly, without the cost or disruption of changing locks. This makes it simple to manage staff changes, contractors and temporary visitors. Permissions can be customised, and real-time alerts and notifications keep you informed of important events. Systems can also be integrated with alarms, CCTV, and other building services to automate actions and strengthen overall site security.

PREVENTATIVE MAINTENANCE

Preventative maintenance keeps your systems operating at peak performance, reducing disruptions and extending hardware life. Regular inspections, performance checks, and optimisation ensure reliability and compliance across all sites.

With fast fault detection, timely repairs, and detailed service reporting, we help minimise downtime and maintain transparency. Priority support and audit-ready documentation provide confidence that every system continues to perform safely and efficiently.

MANAGED SERVICES

Outsource your system administration to the experts and keep operations running smoothly while you focus on core priorities. Our team provides remote support, troubleshooting, and user management to ensure secure, efficient access control.

With centralised oversight across multiple sites, regular software updates, and scalable solutions, we help reduce internal workloads and risk exposure—delivering reliable performance and peace of mind as your business grows.

ACCESS HARDWARE & SOFTWARE

Engineered for durability and precision, our access control hardware deliver reliable performance across demanding commercial environments. Built to secure and streamline operations, they provide full visibility and control over every access point.

Our range includes electric strikes, magnetic locks, and smart locking hardware supported by card, biometric, and multi-technology readers. With flexible panels and platforms available as stand-alone, networked, or cloud-hosted systems, we enable scalable management, detailed auditing, and complete accountability.

INTEGRATION & AUTOMATION

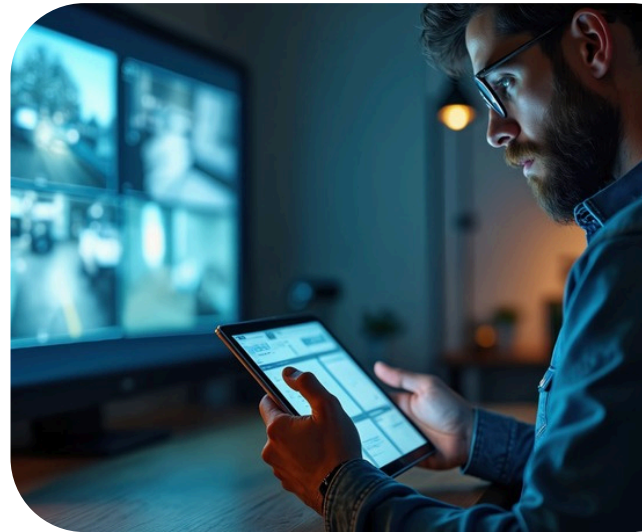

Integration and automation elevate security beyond simple access control. By connecting with CCTV, alarms, and building management platforms, they streamline operations and enhance site efficiency. Custom systems automate processes to reduce errors, support compliance, and enable remote management with flexible scheduling. Real-time alerts and seamless links to cameras, gates, power, HVAC, and booking systems create a unified, intelligent security network.

CCTV, SURVEILLANCE & ALARMS

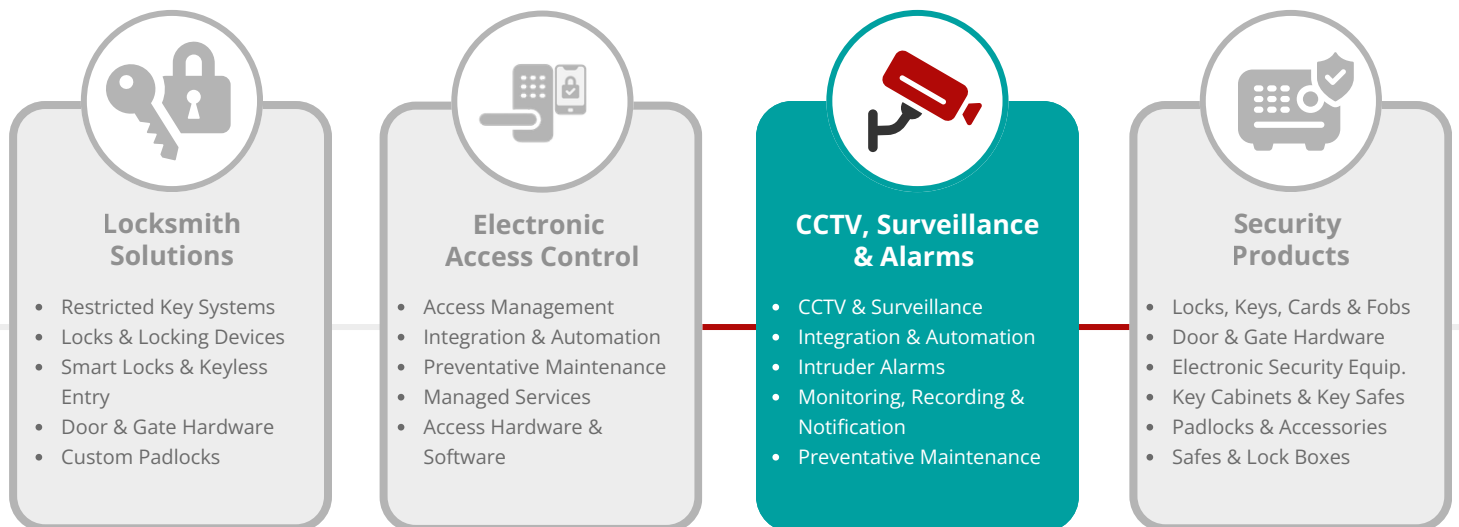

BullAnt's CCTV, surveillance and alarm solutions provide real-time visibility, early threat detection and automated response to keep your people, property and operations safe. Our systems integrate seamlessly with access control and building management platforms, giving you a unified approach to security.

From a single premises to complex, multi-site facilities, we design scalable solutions that deter intruders, monitor activity and enable faster, more informed responses to potential risks.

THE BENEFITS TO YOUR BUSINESS

- Safer workplaces through proactive monitoring and early threat detection
- Faster incident response with integrated alerts and automation
- Reduced human error and manual monitoring requirements
- Real-time visibility and forensic-grade recording for improved accountability
- Streamlined operations through centralised management platforms
- Scalable architecture designed to grow with your business

CCTV & SURVEILLANCE

Our advanced CCTV and surveillance systems provide real-time visibility, forensic-grade recording and intelligent detection to monitor operations, protect assets and deter threats. With smart integration, they connect seamlessly into broader security platforms for centralised control.

INTRUDER ALARMS

Our intruder alarm systems are engineered to detect unauthorised access with precision, triggering instant alerts, automated responses and acting as a strong deterrent against breaches. Integrated with CCTV, they also provide visual verification for faster, more informed decision-making.

MONITORING, RECORDING & NOTIFICATION

We deliver high-definition recording, real-time monitoring and intelligent notification systems that keep you informed and in control at all times, whether you're onsite or remote. These platforms integrate seamlessly with broader security systems to provide a clear picture of activity across your property.

PREVENTATIVE MAINTENANCE

Preventive maintenance servicing keeps your security systems performing at their best. Through scheduled inspections, fine-tuning and optimisation, we help you avoid costly disruptions, extend the life of your hardware and maintain compliance with industry standards.

INTEGRATION & AUTOMATION

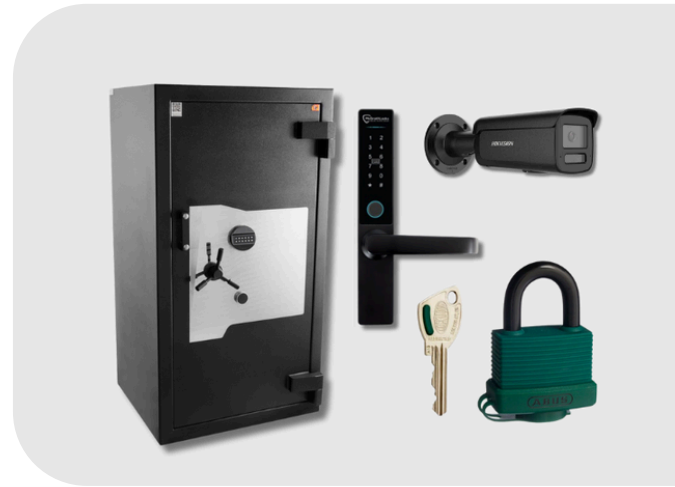

We integrate CCTV, access control, alarms, and building management platforms into a unified security network. This centralised system automates alerts, recordings, and event-triggered responses, reducing manual oversight and improving situational awareness across your sites.

SECURITY PRODUCTS

Practical and durable, our products are designed to safeguard valuables while standing up to the demands of everyday use. Built from quality materials and engineered for longevity, they offer reliable protection in busy, high-traffic environments.

Beyond security, each product helps streamline management and improve accountability across workplaces, facilities, and shared environments. By combining functionality with thoughtful design, we make it easier to track, store and protect what matters most.

THE BENEFITS TO YOUR BUSINESS

- Reliable protection for belongings, valuables and sensitive items
- Centralised key and asset management to reduce risk and downtime
- Flexible options from mechanical to advanced electronic systems
- Simple, user-friendly access systems for staff, students and visitors
- Durable construction built for high-traffic commercial and industrial use
- Enhanced compliance, auditability and operational efficiency

Locksmith Solutions

- Restricted Key Systems
- Locks & Locking Devices
- Smart Locks & Keyless Entry
- Door & Gate Hardware
- Custom Padlocks

Electronic Access Control

- Access Management
- Integration & Automation
- Proactive Maintenance
- Managed Services
- Access Hardware & Software

CCTV, Surveillance & Alarms

- CCTV & Surveillance
- Integration & Automation
- Intruder Alarms
- Monitoring, Recording & Notification
- Proactive Maintenance

Security Products

- Locks, Keys, Cards & Fobs
- Door & Gate Hardware
- Electronic Security Equip.
- Key Cabinets & Key Safes
- Padlocks & Accessories
- Safes & Lock Boxes

ACCESS CONTROL SYSTEMS, HARDWARE & SOFTWARE

- Fobs and RFID cards
- Biometrics and mobile apps
- Override keys
- Electronic locks and strikes
- Access-control software & hardware
- Readers
- Keypads
- Controllers

ALARM SYSTEMS, DETECTORS & NOTIFIERS

- Keypads
- PIR motion detectors
- Reed switches
- Glass break detectors
- Fobs and RFID cards
- Smoke detectors
- Panic and duress devices
- Sirens and strobe lights
- Line and SIM backup communication

CCTV SYSTEMS & RECORDERS

- Motion-activated cameras
- Analytics-enabled cameras (facial and number plate recognition)
- Night-vision cameras
- Network and digital video recorders (NVR/DVR)
- Monitors and display screens
- Audio devices and speakers

DOOR & GATE HARDWARE

- Locking devices
- Door handles and lever sets
- Door and gate closers
- Door viewers and view panels
- Door hold-open devices
- Blocker plates, scar plates and door seals

SECURITY PRODUCTS

EMERGENCY EXIT & LOCKDOWN DEVICES

- Panic bars and crash bars
- Emergency exit hardware
- Lockdown devices
- Exit-only hardware
- Restricted entry and egress systems
- Fire-Rated & BCA Code-Compliant Locks

KEY SAFES & KEY CABINETS

- Key safes
- Key cabinets
- Electronic key cabinets
- Key management software

KEYLESS ENTRY & SMART LOCKS

- Push-button mechanical locks
- Electronic locks
- Smart locks

KEYS, CARDS & FOBs

- Keys
- Restricted keys
- Fobs and RFID cards
- Wrist bands & remotes
- Credential accessories such as keyrings and lanyards

LOCKER LOCKS

- Personal padlocks
- Combination locks
- Key override options
- Smart locker locks

LOCKS & LOCKING DEVICES

- Restricted lock systems
- Mechanical locks
- Electronic and smart locks
- Gate and roller door locks
- Lock cylinders and barrels
- Deadbolts, night latches and locking bolts
- Cabinet and drawer locks
- Fire-Rated & BCA Code-Compliant Locks

PADLOCKS, HASPS & CHAIN

- Commercial and industrial padlocks
- High-security padlocks
- Electronic padlocks
- Outdoor / harsh environment / Corrosion-Resistant
- Security hasps
- Security chain
- Lockout and isolation padlocks

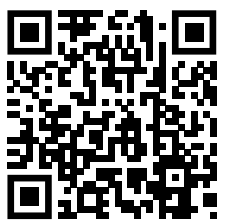

SAFES & LOCK BOXES

- Commercial safes
- Fire-resistant safes
- Drug and medication safes
- Gun and rifle safes
- Cash and document safes
- Secure lock boxes
- Tamper-resistant storage solutions
